At about 2300 the trucks at SJAM/Booth started to get highly highly irritated and started revving their engines enough so that the heavy equipment operator and the assigned cruiser pulled back a little until it deescalated.

They then proceeded to offer the heavy equipment guy \$5000 to move his truck to let them through. (he did not accept)

About an hour later ██████████ approached an officer with some questions that he was not able to answer so the contact info was forwarded to me for follow up.

I asked Staff Frost to go speak to ██████████ (at that time I only knew that a ██████████ was inquiring-no other details).

██████████ indicated that there was a high level of irritation from this BC group because they drove all the way here and had to be parked so far away. ██████████ thinks if we could do something to arrange to get some up there it might de-escalate things a bit. (Perhaps they do not realize that they should be organizing that themselves with their friends who arrived a day early and took all the spots)

██████████ indicated that their convoy Command Post is located at the ██████████ on Daly street ██████████ identified his role as planning and logistics guy.

Staff Frost engaged ██████████ about what the ██████████ entailed. Essentially they are going to envelope the area with trucks and not move, this creates a big '██████████' and a great deal of traffic gridlock would be the goal.
